

SUBMERSIBLE MULTISTAGE PUMPS

RSM SERIES

These Premium Series multistage pumps have exceptional efficiency for the power consumed. Ideal for underground or above ground tanks. They have excellent pressure supply and may be supplied with Pressure Switch and Tank or an Inverter Controller. They are constructed with Industrial Grade Induction Motors and backed by our 2 year warranty.

APPLICATIONS

- Clean water supply and booster pump for wells and tanks
- Household supply and irrigation
- Commercial fountains - continuous rating
- Residential water systems - unit complexes

FEATURES & BENEFITS

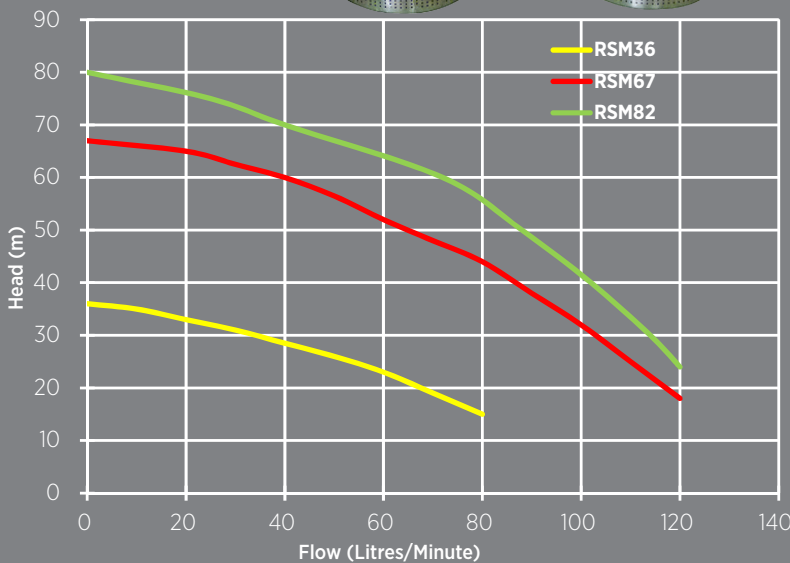

- Premium 5" multistage for quiet operation
- Low power consumption - save power
- Excellent pressure supply up to 800Kpa Max
- Continuously rated - reliable long term operation
- Made in Italy - quality guaranteed
- Can be installed horizontally

CONSTRUCTION

- Stainless steel motor housing, shaft & bushes
- Noryl impellers & diffusers
- Thermal overload protection with auto reset
- Double silicone carbide/graphite mechanical seal separated by oil chamber
- IPX8 rating / insulation class F

PUMP CONTROL OPTIONS

- REEFE® Pressure Controller / Switch / Tank
- REEFE® Dual Pump Controllers / Variable Speed Controller
- Incorporate with RainPro® RM1500 water diversion valve for Rain to Main backup
