### ABOUT

PowerClear is a compact fountain pump with integrated UV clarifier and filter function for underwater operation. PowerClear is available in two sizes, PowerClear 5000 for ponds up to 5000L capacity and PowerClear 9000 for ponds with a capacity up to 9000L (with no fish). A compact combined solution, in which the functions of filtering, clearing and pumping can be used in one top quality product.

### APPLICATIONS

Water Features  
 Ponds  
 Waterfalls

### KIT INCLUDES

Three different spray nozzles, telescope tube and hose connection.

### FEATURES & BENEFITS

Neat, tidy, compact all in one unit - ideal for small spaces  
 Low wattage - low running costs  
 Contains 4 different filter mediums for clear water  
 Individual regulation of flow rate and fountain height  
 T-piece for operating water features with multi-stage hose connection
