

# RM7000-3 RAIN MAINS SYSTEM WITH SADDLECOVER

RM SYSTEMS

RM7000-3 Rainpro® is the RM4000 RainPro® “Easy Install” unit with the added advantage of a pump cover. No cables, no float, no solenoid, no electronic controls. Kit comes complete with cover and flexible hose. The RM7000-3 restricts mains supply while rain water is being pumped to help conserve our precious resource. This system is only suited to flooded suction and is best for supplying laundry and toilets, and small houses & cabins (1 bathroom). For suction lift and underground tanks, use submersible pump option RM5000-3. For whole house supply (with more than one bathroom) use the RM1500. Pump covers available in a variety of colours to match most standard tank colours.

## APPLICATIONS

- Domestic toilet & laundry
