

FILTER & WATERFALL PUMP 240V

HIGH PERFORMANCE SERIES

These pumps deliver the high performance needed for filter systems and spectacular waterfalls. With vortex Impeller design (on 10000, 18000 and 28000) and prefilter cage, these pumps will comfortably handle soft solids for filtration. They also feature wear-resistant ceramic bearings, asynchronous motors and thermal overload protection. Inline/dry-mounting is possible, with flooded suction. Cage is very easy to remove for maintenance.

APPLICATIONS

- Water features
- Ponds
- Fountains
- Statues
- Waterfalls
- Filtration

*Always check the pressure rating on your pressure filters when using these pumps

Not suitable for salt water

FEATURES & BENEFITS

- Powerful with high head pressure for waterfalls
- Fully submersible, patented design
- Quiet, continuous operation, low power consumption
- Thermal overload protection
- Soft solids handling
- Ceramic bearings
- Dry-mount With flooded suction
- Adjustable base-plate can be rotated
- Electrical Safety Approval to AS/NZS 60335.2.41
