

CLARIFIER BACTERIA FOR PONDS

Clarifier Bacteria is a concentrated blend of specific bacteria and enzymes that have numerous superior abilities. Helps control algae by reducing nutrients which encourage algae growth. Reduces ammonia, nitrates, phosphorus, hydrocarbons and odours. Stabilises water chemistry and consumes pond sludge.

CODE	DESCRIPTION	TREATS
18101	Clarifier Bacteria - 22.5g sachet	8,000L
18102	Clarifier Bacteria - 85g	30,000L

STRING ALGAE TREATMENT

This product naturally eliminates blanketweed (string algae) without harming fish or plants. It contains unique, effective natural plant extracts and a special bacteria blend. Value-for-money, highly concentrated powder.

CODE	DESCRIPTION	TREATS
18050	String Algae Treatment - 22.5g Sachet	6,250L
18052	String Algae Treatment - 93g Jar	25,000L

POND CONDITIONING BLOCK

Pond Conditioning Blocks are specially formulated to keep your pond water crystal clear by preventing unsightly coloured water due to excess sunlight. This product will also remove chlorine, chloramine and ammonia, making the water safe for fish.

Mainly suited to very small ponds which don't justify a biofilter.

CODE	DESCRIPTION	TREATS
18120	Pond Conditioning Block - 20g (Minimum Order Qty: 5) Dosage: Use one section of the block per 200L of pond water. (One complete block will treat 800L)	800L

FEATURE POND TREATMENT BLOCK

Feature Pond Blocks will maintain crystal clear water and clean water features. DO NOT use in ponds with fish or plants, or ponds with excessive splash. For ponds with fish or aquatic plants, use PondPro Feature Algae Clear natural pond treatment.

CODE	DESCRIPTION	TREATS
18122	Feature Pond Treatment Block - 20g (Minimum Order Qty: 5) Dosage: Use one section of the block per 200L of pond water. (One complete block will treat 800L)	800L
