

RM5000-4 SUBMERSIBLE RAIN MAINS SYSTEM

EU SERIES

The RM5000-4 features a Submersible Multistage Pressure Pump with integral controller, specifically designed for fast and easy installation. The system is 100% European made, guaranteeing exceptional quality and performance in Rainwater supply applications. This system is suitable for underground tanks and best suited for supply to toilet, laundry and garden taps/outlets.

APPLICATIONS

- Rainwater System
- Irrigation
- Clean water transfer from tank and wells
- Construction
- Small Commercial Sites

FEATURES & BENEFITS

PUMP

- Automatic start and stop depending from demand of water by users.
- Integrated pressure controller with 240kPa/2.4 bar cut-in
- Supplied with 10m H07RN8F
- Integrated run-dry protection
- Valve blockage detection system
- Compact design
- Water-cooled motor
- Thermal overload protection

RM SYSTEM

- Rain to Mains Valve
- Integrated check valve, 100% Hydraulic
- Corrosion resistant
- Tested to AS4020 for potable water
- Watermark Certified componentry

CONSTRUCTION

- Stainless Steel AISI 304 Pump body, motor shaft, handle, cover, screen
- PPO Impellers, diffusers
- Alumina.Graphite, lubricated mechanical seal
- Nickel coated brass valve
