

EXTERNAL RAIN MAINS SYSTEM

RM7000-3

RM7000-3 RainPro is the RM4000 RainPro “Easy Install” unit with the added advantage of a pump cover. The Rain Mains device has no cables, no float, no solenoid, no electronic controls. Kit comes complete with cover and flexible hose. The RM7000-3 restricts mains supply while rain water is being pumped to help conserve our precious resource. This system is only suited to flooded suction and is best for supplying laundry and toilets, and small houses & cabins (1 bathroom). For suction lift and underground tanks, use submersible pump option RM5000-3. For whole house supply (with more than one bathroom) use the RM1500-2. Pump covers available in a variety of colours to match most standard tank colours.

APPLICATIONS

- Domestic toilet & laundry
- Small house / cabin / granny flat (1 bathroom)
- Small commercial / Industrial*
- Garden Irrigation*
- Toilet blocks (up to 6 fixtures)*
- Construction / mine site offices*
