

MULTISTAGE SUBMERSIBLE PRESSURE PUMPS W INTEGRATED PRESSURE CONTROLLER

RSMP SERIES

With an integral pressure controller, the RSMP range of submersible multistage pressure pumps offer many benefits over standard submersible pumps with separate pressure controllers, including quicker install time with less parts, and increased reliability.

APPLICATIONS

- Clean Water Transfer
- Household Supply
- Rainwater Tanks
- Industrial Cleaning
- Commercial Laundries
- Rain to Mains Backup Systems

FEATURES & BENEFITS

- Integrated Pressure Controller
- Integrated run-dry protection
- Integrated leak-detection function
- Auto restart function
- Integrated Check Valve
- Compact design
- Water-cooled motor
- Thermal overload protection
- Corrosion resistant
- Electrical Safety Approval to AS/NZS60335.2.41
- Certified to AS/NZS4020 for use with potable water

CONSTRUCTION

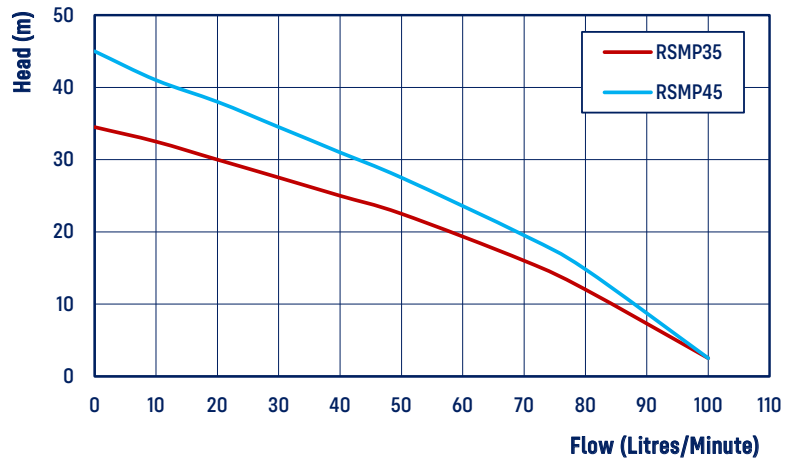

- Grade 304 Stainless Steel Outer Casing
- PPO Impellers & diffusers
- Stainless steel Grade 304 Motor Shaft
- Plastic Pump Base and Discharge Body
- Brass Threaded Outlet
- Ingress Protection IP68
- Insulation Class F

RSMP35
